"THE SEA! THE SEA! THE OPEN SEA!
THE BLUE, THE FRESH, THE EVER FREE."

The sea is calling to the Man on the Land and his Family, to the Business Man in city or country town, and to his Fish, to each Matar and Kitchin seeking change and recuperation, and to each run-down Commercial Man desiring rest and change. The first and best of ocean resorts is

CRONULLA,

The most select, the very beautiful, the exceedingly restful, the sweetest in memories of the past. Yes: if you can afford it, Cronulla is the delightful summer retreat in which you should own a seaside residence. Now, this summer, take a step forward—buy a block in

The BEACH PARK ESTATE,

Within fifteen minutes of the beach, bounding, Millway surf, and only an estuarine stroll from the hotel and the tram. A few years ago the trustees of the Holt-Sutherland Estate offered to sell this choice stretch of land to the Government for a park—a thing of beauty and a joy for ever—but the opportunity was lost. Then the Vendors acquired it, converted to the Holt-Sutherland Estate, and the simple of ten acres to be dedicated as a Public Park in perpetuity, and further set apart 100 acres for the formation of a golf links. Now, if you know Cronulla, you must perceive that the Beach Park Estate must become, par excellence, the select quarter of Cronulla. Therefore, get in early—values will most certainly advance greatly in the next year, and for home or for investment your purchase will always be a source of satisfaction to you.

On MONDAY, 27th December (Boxing Day)

On the Ground, at 2.30 p.m. this Magnificent Estate will be Auctioned.

TERMS:—5 per cent. deposit; balance (including interest) at 5 per cent. per annum, payable at the rate of 10/- per month for every £25 of purchase money.

Torrens Title. **Arthur Rickard** **Realty Specialists** **Open till 9 p.m.** **on Mondays and Fridays.**

Easy to prepare; Refreshing and Nutritious

These are the days of strained nerves and ill-nourished tissues, due to the strenuousness of modern life. Therefore it is most essential that the system should be replenished. Horlick's Malted Milk supplies those elements which an ill-nourished body requires, and after a few glasses, a wonderful acceleration of nerve force is experienced. Horlick's Malted Milk supplies nutriment to the tissues, which quickly respond to its nourishing properties. One is then able to go about their daily work with renewed vigour and vitality, thinking better, working better, and enjoying life better.

The least skilled person can prepare Horlick's—it is merely a matter of adding hot or cold water and the resulting FOOD-DRINK is a delicious beverage, stimulating, soothing, and strengthening. It soothes the nerves, giving peace and contentment to the frame, and all the while Horlick's is doing its good work—restoring, building, and benefiting.

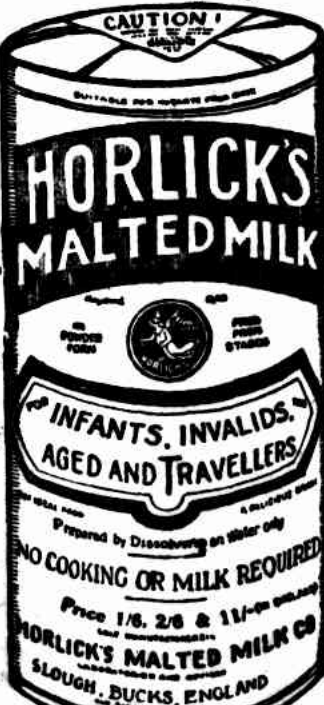

Horlick's watchword is Purity. It is made in the most hygienic factory under ideal conditions and untouched by hand.

Try a Glass of Horlick's at the Soda Fountain To-day.

See Special Window Display (including our famous Lunch Tablets and our ideal Infants' Feeders) at present at—
C. E. NEWMAN, Premier Drug Stores,
Albion-street, Waverley;

ON THE LAND.

FARM AND STATION.

IN THE TIMBER LAND.

TUMBARUMBA'S FUTURE.

The Tumbarumba district should assume great importance in the course of a few years, when the provision of railway facilities leads to the proper exploitation of its natural resources. The forestry interests will always be valuable, the rich soil and good rainfall mean prosperous agriculture, while the district should become popular as a tourist and health resort when transport arrangements are more convenient. At present there is but a small and quiet township on the banks of the Tumbarumba Creek, lying in a snow-valley among the hills on the southern tableland. Coming into existence in the early days of a mining town, it has long depended upon the timber and pastoral industries. Gold production has become a very minor matter, although, of course, the old hands are satisfied there is gold still in the vicinity. There was never an old mining township that did not dream of a resurrection of past glories. Mining operations are still being conducted, and a lot of good soil being washed away to the sea. The tract of the glowing granite is seen in acres of scarred hillside that will take centuries to regain any soil value. And the soil in the district in days to come will prove a greater and more lasting benefit than any goldmine.

While there has been little progress in agriculture in the past, sufficient has been done to prove the capability of the district. The rich healthy growth of English trees and fruit, particularly apples, pears, and cherries, and cherry trees, the stand of imported grasses are proof of a salubrious climate, and a rich soil. At the present time the visitor is struck with the gorgeous masses of blossoms in the old-fashioned garden about the town and district. The amateur suburban gardener is filled with envy when he sees the masses of sweet pea, with large blooms of most delicate tints growing almost wild. Outcrops and shrubs grow in similar profusion. All these things are the result of a congenial, invigorating climate.

With railway connection with the hotter districts in Riverina, Tumbarumba seems certain to become a great tourist resort. The former parts during the summer. A 26-mile drive along the Ballow-road brought one to the forest country, over 2000 feet above sea level, and it was a rare delight to ride through the dense forest, with its towering trees and its soft, dappled light. On every side were gullies showing an endless array of straight, tall trunks of mountain ash and gum, and the different greens broken by splashes of dark bark, and the soft, dappled light made a series of splendid pictures. Here and there were trailing creepers and masses of fern, but on the whole, the forest, comparatively, is very clear of undergrowth. Cleared areas are seen here and there, and when up and looked after the forestry business seriously, it will be well worth a visit. A noticeable feature is the absence of bird life. Woodlands without birds seem something unfinished. This is typical, unfortunately, of the whole country.

In the same part of the country 20 odd years ago the writer had a vivid remembrance of the ceaseless choir that thrilled the air as one rode through the forest. The choir of the mountain ash and gum, and the soft, dappled light made a series of splendid pictures. passed. There happened to be only seven settlers present at the meeting when this important motion was passed, which fact so far has not been made public. I think it only fair that this should be known, as the settlers are extremely anxious to have the very best commission. It is possible to find, their success largely depending upon the administration.

AROUND MURRUMBURRAH.

A RICH WHEAT BELT.

OF OUR SPECIAL REPORTER.

Murrumburrah is the centre of a rich agricultural district. It divides the wheat belt that starts as far north as Gelong and extends to Wallendbeen and Cootamundra. The undulating nature of the country makes it ideal from the standpoint of the farmer. Viewing the country from the eminence of the town, a splendid idea of the extent of land that is under cultivation, and the still remaining areas that are as yet not cultivated, is obtained. One farmer, speaking of the country, said that the French Republic's attempt, during the French Revolution, to produce cheap food, which resulted in non-production and starvation.

SEED WHEAT.

FARMERS' COMPLAINT.—A Tamworth farmer, Mr. A. F. Rogers, has a complaint to make against the Agricultural Department in reference to the purchase of seed wheat. He has purchased seed wheat from another farmer, Mr. Warner, at 25/- per ton, and took delivery from him at 25/- per ton. The price agreed upon was 25/- per ton, but the Agricultural Department, when it came to issue the seed, refused to pay more than 20/- per ton. Mr. Rogers is very angry at this, and has written to the department asking to know the extra expense of the per ton, and has written to the department asking to know the extra expense of the per ton, and has written to the department asking to know the extra expense of the per ton.

SPEECH DAY.

ST. JOSEPH'S COLLEGE.

Archbishop Kelly presided at the annual distribution of prizes at St. Joseph's College on Monday. In making his report, the director of the college, Brother David, expressed keen gratification at the year's record. Scholars of St. Joseph's had been very successful in the public examinations, and in the department of sport the boys had distinguished themselves, while the health of the college, through the efforts of the staff, had been excellent. A former student of the college, Monsignor Kelly, of Adelaide, had been appointed Bishop of the diocese. As far as was known, 200 old boys had volunteered for active service. Probably the number was much greater. Of these 21 had been wounded. In connection with the other secondary schools of the State we regret the passing of the year, and the senior examinations in its division. It was a very successful year for the college, and the staff had been very successful in the public examinations, and in the department of sport the boys had distinguished themselves, while the health of the college, through the efforts of the staff, had been excellent. A former student of the college, Monsignor Kelly, of Adelaide, had been appointed Bishop of the diocese. As far as was known, 200 old boys had volunteered for active service. Probably the number was much greater. Of these 21 had been wounded. In connection with the other secondary schools of the State we regret the passing of the year, and the senior examinations in its division. It was a very successful year for the college, and the staff had been very successful in the public examinations, and in the department of sport the boys had distinguished themselves, while the health of the college, through the efforts of the staff, had been excellent. A former student of the college, Monsignor Kelly, of Adelaide, had been appointed Bishop of the diocese. As far as was known, 200 old boys had volunteered for active service. is simple enough. Its appliances depend on circumstances and surroundings. On the German submarine, meant for service in the coastal zone, the windlass and hauling track between shears, where the cable of the line is limited. Their career is short-lived, but, while it lasts, normally no other. There, told off for deep-sea service, they are attempting to get the most out of any excitement at quite quietly, and without the inside of the North Sea, making no distinction between neutrals and allied ships. These carry guns, and since their range is short, as we know, engage them there—on the submarine firing, and raising again in unexpected quarters. The trawler being sinking, and trying to ram. The German is strongly built, and can stand a greater deal of weariness than about the straits of Sicily, and fire into the brown of them. When the war was young, the

be. Lastly, there are German submarines which perish by ways so curious and inexplicable that one could almost credit the whirled idea (it must come from the Scottish shippers) that the ghosts of women drowned sink them to destruction. But what of the shadows take—whether of the London ladies, or humbler stewardesses, or hospital nurses—and what lights or sounds the fancies it sees or hears before it is shut out, no man will ever know.

that the work is being done. Whether it was necessary or polite to restrain by violence, every working instant of a going people is a question which the man may have to consider later on.

STEEL WORKERS

NEWCASTLE DISPUTE.

MUST BE NO CESSATION OF WORK.

A deputation from the Amalgamated and Australasian Engineers, consisting of Messrs. Quintrill, Emerson, Bell, and Bryant, and introduced by Mr. Watkins, M.P., of Wigan, met the Steelworkers' representatives at the Newcastle Hotel, on Monday evening last.

Mr. Hughes yesterday regarding the dispute at New Haven.

It was stated that the rate raised for the Steelworkers' award in connection with the continuous system was a lower rate than under the State award. The State award made on the same basis the same award provided for 15 an hour overtime and double for 10 Sundays. The devaluation pointed out that the conditions of the award made the State award had been made were the lower award. The award did not now work the same terms of the State award, which was made in the ordinary conditions of the industry.

Mr. Hughes, in reply, said that he would not venture to say anything on the merits of the dispute, but there must be a cessation of work. That was the basis on which any practical scheme for the permanent adjustment of the dispute would be based. He said he felt sure that the present award was a suspension of settlement, and by the agreement to the suggestion made by the devaluation that a cessation of representation of the parties concerned should be called.

Mr. Hughes said he wished to telegraph to Delprat accordingly, and later on.

TRAMWAY AWARD.

£250,000 EXTRA.

COMMISSIONERS' APPEAL.

In the Legislative Assembly last night the Premier made a statement regarding an award recently made for the tramway, which would have the effect of increasing the wages sheet by £250,000.

Mr. Holman said he had received communication from the Chief Tramway Commissioner bearing upon the award. The Chief Commissioner stated that the award would involve the department in an extra expenditure of £250,000 per year. The Commissioner stated that it was his intention to appeal against the award, and he (Mr. Holman) therefore did not propose to discuss it at that stage.

that the Chief Commissioner asked in the matter before him, the Cabinet was the expression of the attitude of Government. The Cabinet pointed out to the Chief Commissioner that the Government was not in a position to make any concession, that while they recognized that in discretion in the matter rested with them, they thought that the award should be raised as far as it affected an increase in the minimum wage. The wages board told the minimum wage no longer represented the present cost of living, and the wages board had gone further by proposing that the award should be raised more than the minimum wage should be raised correspondingly. The question was raised as to whether the award should be raised as the wages of those receiving more than a minimum wage was a matter that would be argued fully by the Government. The Government proposed that the award should be increased by the proportionate increase had been lost in the Commissioner's hands. Mr. Haddad said that a large proportion of the £250,000 increase the advance in the award was represented.

Mr. Homan said he had not the knowledge to present.

LOCAL EFFORTS.

BOMBS AND SHELLS.

The Premier has received from the prime Minister of the Commonwealth a report of the results of the inter-Allied Conference on Munitions Committee.

This shows that a great deal of active work is under way to supply not only shells but other munitions of war on a large scale. These include bombs, apparatus for firing poisonous gases, and other warlike equipment. It is stated that the munitions of the Munitions Warfare Corps have been made more difficult to handle.

It has been declared that only those skilled men who have completed the course of instruction in the manufacture of munitions are allowed to be members of the munitions forces, and that munitions shall be distributed to the forces, according to the troops, and with a certificate. The forces are to be discharged from the forces at the request of a manufacturer of munitions, and the manufacturer must guarantee the quality of the munitions distributed while he (the

(turer) remains a constant factor in the construction, and the State Maritime Commission must satisfy themselves of the fitness of any applications for the granting of a license from the A.I.Z.

NEW ZEALAND.

THE NATIONAL REGISTRY.

SELF-CONFERRED SHIPBOARD.

WELLINGTON, Dec. 7.

The national registration figure, already published, are regarded as satisfactory, though they do not warrant the country taking on additional responsibilities in regard to the expeditionary forces. Looking at the matter in the light of the forms from the most hopeful point of view, the result is only sufficient to meet the requirements for a three-years war, 1937 to the 31st Dec. 1939.

GREECE.

BETTER OUTLOOK

MACEDONIA.

ANGLO-FRENCH RETREAT

According to Reuter's Agency King Constantine gave audience to a diplomatic body on Saturday. His Majesty gave personal assurances which are regarded as satisfactory.

A Salonica report says that Greece has accepted the stipulation regarding the withdrawal of the Greeks concentrated at Salonica, but is retaining a contingent to assert Greek sovereignty.

The retirement in Macedonia continues according to plans. All the material has been saved.

On Sunday the French occupied a line from Ghevgeli to Kiliadir (10 miles south-east of Ghevgeli).

A French communiqué reports lively artillery engagements at many points on the western front.

The British shelled the enemy north of La Bassée Canal with heavy howitzers.

A Bucharest message states that during a recent engagement the Russians torpedoed and damaged the Goeben in the Black Sea.

It is reported from Berlin that Germany has completed an enormous output of machine-guns for the defence of the entire eastern front.

POWDER FACTORY.

BLOWN UP IN HAVRE.

ONE HUNDRED AND TEN PERSONS KILLED.

LONDON, Dec. 15. A powder factory used by the Belgians in Havre has been blown up, 110 people killed, and 1000 injured.

The explosion occurred at 10 o'clock on Sunday morning in an excavation 1000 feet deep, one hundred and fifty workmen employed in a building surrounding the excavation. The building was blown to pieces, and is now a heap of ruins.

The cause of the disaster has not been ascertained. Havre residents believed an earthquake had occurred.

The factory was two miles outside the town and in full swing at the time of the explosion. The victims were mostly Belgians. Many were killed in the buildings adjoining the factory.

A Belgian account states that after the explosion the wounded were removed to the town. The dead were buried in the morning. The cause of the disaster was not ascertained.

The factory was two miles outside the town and in full swing at the time of the explosion. The victims were mostly Belgians. Many were killed in the buildings adjoining the factory.

A German wireless says that workmen's houses were destroyed, walls 10 inches thick blown into the air.

SELF-MARTYDOM.

FRENCH OFFICER'S SACRIFICE.

The "Daily Chronicle" Salonica correspondent writes that he has received trustworthy information regarding the extraordinary self-martyrdom of a French submarine officer. When the Turks decided to exhibit a captured French submarine, the Turkish engineers found they were not acquainted with the internal mechanism. The authorities sent for the French officer, who, learning their mission, offered the opportunity for destroying the submarine.

He made his fellow-prisoners goodbye and suppressed shouts of Vive la Patrie. While demonstrating the machinery of the submarine to six superior Turkish officers, the Frenchman managed to start the engine. The submarine sped away, diving, and was not seen again.

THE KING.

MEDICAL BULLETIN.

The Press Bureau has issued the following medical bulletin:—The King has recovered from his grave accident as a result of the fall from the horse on December 10th. The King has lost seriously in weight, and until his normal state of health is attained it is essential that he should avoid fatigue. It has been necessary to take a little stimulant daily during his convalescence. When his health is restored he will resume total abstinence, which was self-imposed for public reasons.

WESTERN FRONT.

ARTILLERY ACTIVE.

SIR JOHN FRENCH'S REPORT.

LONDON, Dec. 14.

A French communiqué reports lively artillery engagements at many points. Our batteries partially destroyed the only German bridge at Saint Mihiel which the Meuse floods left standing. Our bombardment of Bouchoywood, on the Meuse, wrecked German trenches and destroyed machine guns.

Sir John French reports: We bombarded enemy positions east of Ypres, and shelled the enemy north of the La Bassée Canal with heavy howitzers.

The "Telegraph" (Amsterdam) states that many troops have arrived at Courtrai from Serbia.

16,000 MILES OF TRENCHES. Mr. Warner Allen, writing in the "Daily Telegraph," says he saw 234 miles of French trenches upon a ten-mile front. He estimates that there are over twenty miles of trenches to every mile on the western front. Between the North Sea and Switzerland there are ten thousand miles of trenches.

A plaque of enormous size is spreading in certain parts of the front. They are generally made of steel, and are of the shape of a cross. The rats even turn and bite the soldiers' legs when chased. Many terriers have been sent to the front as rat-catchers, and much poison has also been sent.

MESOPOTAMIA.

GENERAL TOWNSEND'S REPORT.

BRITISH POSITIONS ATTACKED.

General Townsend reports that the enemy bombarded his position on the 11th and 12th, making desultory attacks from all sides on the 11th. The enemy on the 10th heavily bombarded Tel-Amarna, and developed an attack on the northern front, which, however, was not pressed. The bombardment was renewed on the 11th. Two attacks were repulsed with heavy enemy losses. Since then there has been no activity. The attitude of the Arabs is reported to be satisfactory. British reinforcements are pushing forward.

Hostile Arabs. Cairo, Dec. 12. It is officially stated that a reconnoitering force from Matruh encountered 300 hostiles on the 10th. The British casualties were 11 killed, while 3 officers and 15 men were wounded.

American Securities. It is officially stated that a reconnoitering force from Matruh encountered 300 hostiles on the 10th. The British casualties were 11 killed, while 3 officers and 15 men were wounded.

Held in Britain. A Rome message says that a traveller depicts Albania as a land of starvation and death. The mountain passes are strewn with the corpses of Serbian women and children, hundreds of whom have voluntarily lain down to die in order to enable the soldiers to have food. Their heroism is the most wonderful episode in the terrible Balkan tragedy.

Refugees at Salonica. Refugees are streaming into Salonica. Many are on mattresses and cots, and carry trifling possessions, such as handkerchiefs and baskets. A few hours will decide whether the Bulgarians are determined to pursue and fight the Allies on Greek territory.

Land of Starvation. A Rome message says that a traveller depicts Albania as a land of starvation and death. THE BALKANS.

GREECE AND ALLIES.

KING CONSTANTINE.

GIVES PERSONAL ASSURANCES.

THE ANGLO-FRENCH RETREAT.

LONDON, Dec. 13.

Reuter's agency states that King Constantine gave audience to a diplomatic body on Saturday. His Majesty gave personal assurances which are regarded as satisfactory.

A Salonica message says it is believed that Greece has accepted the stipulation regarding the withdrawal of the Greeks concentrated at Salonica, but is retaining a contingent to assert Greek sovereignty.

The retirement in Macedonia continues according to plans. All the material has been saved.

On Sunday the French occupied a line from Ghevgeli to Kiliadir (10 miles south-east of Ghevgeli).

A French communiqué reports lively artillery engagements at many points on the western front.

The British shelled the enemy north of La Bassée Canal with heavy howitzers.

A Bucharest message states that during a recent engagement the Russians torpedoed and damaged the Goeben in the Black Sea.

It is reported from Berlin that Germany has completed an enormous output of machine-guns for the defence of the entire eastern front.

A Rome message says that a traveller depicts Albania as a land of starvation and death. DARDANELLES.

"TERRIBLE BATTLEFIELD."

LONDON, Dec. 13.

Mr. Sheppard, American correspondent in the Near East, says that Gallipoli is the bloodiest and most terrible battlefield in history, and will go down to the ages as a name of horror. "The Turks are devilish fighters, but they are always gentlemen."

BLACK SEA STORY.

NAVAL ENGAGEMENT.

In regard to the story of the recent naval engagement in the Black Sea, a report from Bucharest says that the Russians torpedoed and damaged the Goeben. They also sank the gunboats Boukrek and Malatia, also a submarine.

AUSTRALIAN WOUNDED.

RED CROSS COMFORTS.

Sir George Reid (High Commissioner for Australia) has opened branches of the Red Cross stores in Birmingham, Plymouth, Bristol, Oxford, Cambridge, and Cardiff Hospitals, which have been provided with comforts for the Australian wounded.

Many men have been arriving with worn out cardigan jackets, wanting warm clothing. They are now properly equipped directly they arrive.

The War Contingent Association has arranged a Christmas dinner at the Hotel Cecil for all Australians on furlough in London who are not going to the front. At least 500 will be present. Fifteen hundred Christmas parcels arrived this week for the wounded.

Machine Guns. A Petrograd communiqué on Monday made the statement that three Russian destroyers had sunk a Turkish gunboat near the Bosphorus, and themselves sustained no casualties. No official details of the action have so far been vouchsafed us, but the presence of our troops in the Black Sea is a matter of fact.

Merchant Shipping. A Washington message says that America is preparing a Note to France questioning the legality of a French cruiser removing Austro-Germans from the American ships Carthage, Comma, and San Juan, bound for Porto Rico, while in neutral waters.

Refugees at Salonica. Refugees are streaming into Salonica. Many are on mattresses and cots, and carry trifling possessions, such as handkerchiefs and baskets. A few hours will decide whether the Bulgarians are determined to pursue and fight the Allies on Greek territory.

EFFECT IN THE EAST.

Incidentally, it may be pointed out that this cable must not be read to indicate that the Germans are going to establish a long line from the Baltic to the Black Sea, with a machine-gun every yard or so. With the aid of all the machine-guns they can turn out and keep supplied with ammunition, it is impossible to see how they could do so.

The train in at the No. 15 platform instead of No. 1. It gave a great deal more room. Khaki was everywhere in evidence. In addition to many officers connected with military administration, there were a great many previously returned soldiers waiting on the platform to give a hearty handshake to their comrades "in the trenches."

The railway authorities were well-advised in altering the arrangements so as to bring the train in at the No. 15 platform instead of No. 1. It gave a great deal more room.
